DETAILED ACTION

Allowable Subject Matter

1. Claims 1-36 are allowed.
2. The following is an examiner's statement of reasons for allowance: The prior art of record does not disclose a method for producing a control signal associated with controlling a plant, comprising: identifying an error signal associated with a difference between a set point and an output signal from the plant; decomposing the error signal into a plurality of error signal components, a sum of the plurality of error signal components being equal to the error signal, the plurality of error signal components being determined based on a plurality of orthogonal functions representing multi-resolution decomposition properties; transforming each error signal component to provide a corresponding plurality of control signal components; and summing the plurality of control signal components to determine a control signal. The allowability resides in these facts.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
